**NEW TRAFFIC PATTERN ON WASHINGTON HIGHWAY BRIDGE IN
HANOVER**

Traffic headed in both directions will use northbound lanes

Washington Highway (Route 1) (Hanover) – Beginning Tuesday, Dec. 16, drivers will see a new traffic pattern on Washington Highway (Route 1) over the CSX railroad near Ellets Crossing Road (Route 641) and Falling Creek while crews begin a project to rehabilitate the bridge. Crews will work to repair the bridge's support structure and deck.

Over the course of the repairs, the traffic pattern will shift three times, expected to be complete by fall 2015. The first traffic pattern, which begins Dec. 16, will shift all traffic in both directions to the northbound lanes while crews complete repairs on the southbound side. The project is expected to cost an estimated \$2.2 million.

More information on the Washington Highway/Route 1 bridge rehabilitation project is available at

http://www.virginiadot.org/projects/richmond/rt_1_bridge_repairs_in_hanover.asp.

Anyone with questions about the project can call VDOT's customer service center at 800-FOR-ROAD (800-367-7623).

For the latest real-time traffic information or road conditions, call 511 or visit <http://www.511virginia.org>.
